Service & Maintenance
Building Automation

Application

The roof access hatch type G is equipped with two gas pressure springs with an option for additional 24 V LM chain motor for opening the roof hatch and to hold the skylight dome in the open position. The standardised opening width of 1,100 mm ensures convenient entry and exit through all nominal sizes.

Application areas

- accessible flat roofs
- roof terraces
- roof access for maintenance
- new builds and renovations

Features and benefits

- easy, controlled opening with gas pressure spring
- skylight domes securely held in the open position
- can be designed as a roof access hatch
- safe locking mechanism with convenient lock
- available with optional ladder support
- available with motor unit for ventilation for daily aeration and ventilation
