Building Automation

Application

ID600 fall-through protection is a permanent fall-through protection system for all Kingspan arcade rooflights – tested with 600 Joule impact load.

Application areas

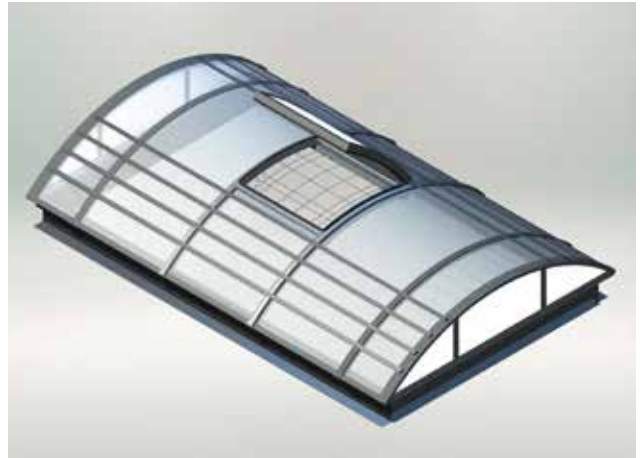

- renovation (by Kingspan fitters only)
- particularly suitable for retrofitting on Kingspan arcade rooflights
- can also be fitted on arcade rooflights from other manufacturers for specific structural preconditions (building-specific testing required)
- integrated ID1200 plus fall-through protection is installed for full flaps
- Kingspan fall and fall-through protection (EAD) is fitted in apex vent openings

Material

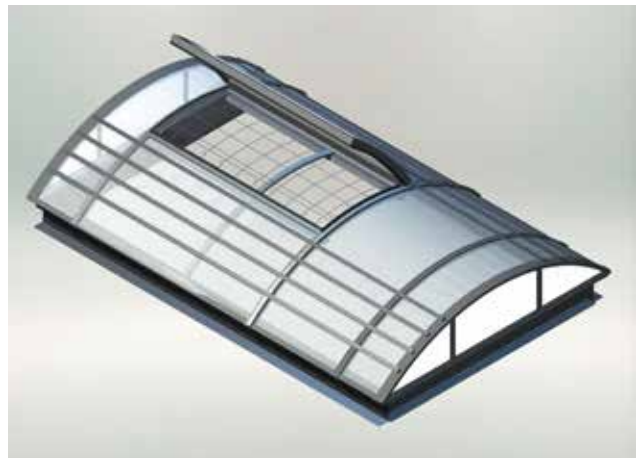

- coil-coated steel (RAL 9006),
other RAL coatings available on request

Features and benefits

- easy installation during arcade rooflight renovation by adding the independent ID600 system
- permanent fall-through protection tested with a fall height of 1.20 m and a impact load of 600 J
- meets the primary requirements of ASR A2.1, category 1 (without glazing)
- complies with requirements to EN 4426
- certified to GS-BAU-18
- also offers fall and fall-through protection for defective glazing
